

3rd Party Managed Inventory - 3MI Service Overview

THE NEXT GENERATION OF INVENTORY MANAGED SOLUTIONS

TR Fastenings is recognised throughout the industry for world-class products and services. We manufacture, stock and distribute a vast range of industrial fasteners and associated components.

3rd Party Managed Inventory About

3rd Party Managed Inventory - 3MI

In addition to our existing Vendor Managed Inventory and Direct Line Feed systems TR can now offer you the benefits of 3rd Party Inventory Management.

3MI works in conjunction with your existing VMI systems allowing you to have all your goods, including non fasteners supplied by your existing vendors, delivered to line by TR Fastenings. This reduces the need for multiple deliveries from many suppliers which in turn can dramatically reduce costs.

TR understands that you have spent valuable time and resource in sourcing your current vendors and that they meet the quality and price standards that are right for you. With TR's 3MI you will still retain all your current vendors and manage the purchase requirements directly with them as you do currently.

For customers who wish to take advantage of our IT expertise we can also book parts directly onto a secure area of your system and arrange controlled releases.

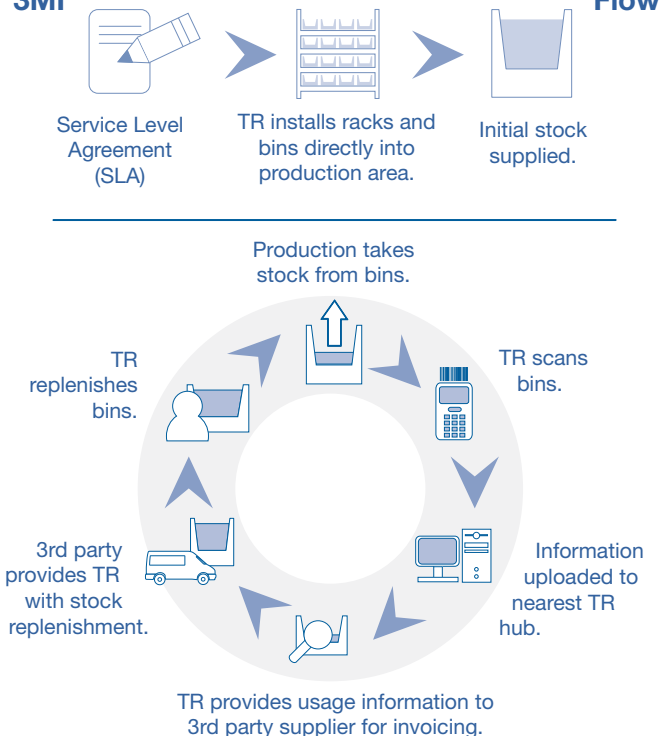

3MI Benefits

- TR / 3rd party suppliers hold stock
- TR scan and replenish all vendors bins
- VMI costs are reduced to a single hourly rate for TR 3MI operative and not a percentage cost from every supplier
- Production can focus on it's core discipline
- All frequently used parts available at point of use
- Health & safety and security benefits

How it works

- Service Level Agreement (SLA)
- TR installs racks and bins directly into production area
- Initial stock supplied
- Production takes stock from bins
- On agreed day, TR 3MI operator visits customer
- TR 3MI operator scans all bins that need replenishing which are colour coded by vendor
- TR DLF operator downloads information to TR location or 3rd party supplier to trigger demand for replenishment stock
- TR 3MI operator or supplier delivers stock and replenishes bins

3MI

TR Fastenings Overview

Our Products

We stock and supply a vast range of standard fasteners to DIN, ISO & ANSI standards

Our own range of fastener solutions for specific industries and applications, including: Fasteners for sheet metal, fasteners for plastic, security fasteners, thread-locking nuts and micro-diameter fasteners from M0.6

TR Engineering & Quality

Our research and engineering capabilities encompass specific engineering disciplines, supporting both our own network and customer application solutions.

TR's excellent quality and inspection processes are in place to prevent the production of non-conforming fasteners with targets to achieve zero defects for specified characteristics

Logistical Innovation

Our continuous innovation and design philosophy means we are always looking at ways to improve our systems.

We are currently in the process of developing iStock - a twin bin DLF system with remote camera surveillance that monitors your stock in real time flagging any requirements as they occur.

TR Website

The TR Fastenings technical website has dimensional information on 1000's of products.

This site also gives our customers access to the most comprehensive free fastener CAD library available. With over 20,000 configurations in the library, you can specify the exact size of fastener you require then download the correctly sized model in any one of 27 different formats.
