

Klima-Flex™ Latching System

Designed for the HVAC industry

We are pleased to announce the introduction of the **Klima-Flex™ Latching System** to our range, specifically engineered to meet the unique demands of the HVAC industry. Our product range is tailored to support air conditioning, ventilation, and heating equipment, ensuring top-tier performance and durability for housing HVAC systems.

Why choose Klima-Flex™?

Klima-Flex™ provides a dependable and straightforward solution for maintaining safety and efficiency across all HVAC installations. Whether you're dealing with fluctuating air pressures or simply need a secure housing, our products deliver a seamless seal and superior protection, ensuring optimal performance in any conditions.

Key features & benefits

Industry-compliant	Fully meets the stringent standards required for HVAC system enclosures
Comprehensive range	Offers all necessary components for secure, reliable, and efficient access to insulated and pressurised HVAC doors and cabinets
Advanced design	The latches, hinges, profiles, and cut-outs are precisely engineered to create a complete seal, safeguarding system integrity
Pressure adaptability	Designed to accommodate both positive and negative air pressure environments. The system handles inward draw in negative pressure scenarios and outward push in positive pressure settings, ensuring seals and latches perform flawlessly

Product range - handles

Klima-Flex 1

Handle, Inside Handle, Interlink Rods, Latching System Acid Proof, Latching Units, Metal Handle, Rod Links, Roller Cams, Safety Catch

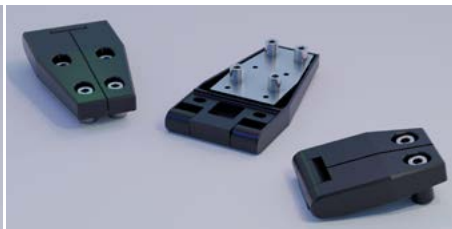

Klima-Flex 2

Handle, Handle for K1 Latch, Inside Handle, Latch Hinge, Latching Units, Rod Link, Roller Cam, Safety Catch, Surface Mounted Latching Unit

Product range - hinges

Klima-Flex Latch Hinge

Klima-Flex 2D Hinges

Adjustable

Klima-Flex 3D Hinges

Adjustable, Heavy Duty

We also offer a full range of fasteners and components, including Enclosure Hardware, Screws, Bolts, Nuts, Rivets, Washers, and Sheet Metal Fasteners to complete your HVAC installation needs.
