## TR Fastenings to showcase product development for the EV market at Battery Tech Expo 2022

**Stands 27 & 28, Hall 3, Silverstone, NN12 8TN, 12th May 2022, 09:00 – 16:30**

TR Fastenings Ltd (TR), part of the Trifast plc group of companies, is exhibiting at Battery Tech Expo – the UK's largest event for the battery industry, bringing together hundreds of industry buyers, specialists and suppliers all in one place for one day.

This EV event being hosted at Silverstone, on 12th May 2022, will encompass over 100 exhibitors and include 30 presentations showcasing developments in battery technologies and the housing units.

With sales of EVs hitting record levels around the world, the roles of fasteners and engineered components have become increasingly significant. TR Fastenings has an extensive product range designed for the EV and EVCU market, this would include such products as battery retention bolts, cable management hardware, compression limiters and designed in special components.

Sven Brehler, Director of Engineering comments:

*TR Fastenings has been involved in the supply of vital components for the EV market for a number of years, and we continue to expand our product range to meet the unparalleled demand from car and battery manufacturers around the globe, and to support the growth of our customers along the way.*

*Battery Tech Expo 2022 enables us to engage with professionals from all sectors within the battery technology industry, and to showcase our comprehensive product range.*

Joining Sven at the event will be Dan Pereira, Regional Engineering Manager UK & Ireland, Andrew Fletcher, Director of Plastics & Rubber (Commercial & Technical) and Automotive Sales Managers Malcolm Hildyard and John Pountney.
