2011

TR's latest product proves a runaway success!

TR Fastenings stocks a range of Concealed Head Studs.

The sale of this product has soared, with many sizes selling instantly. Therefore the product range and quantities stocked have been increased further.

Concealed Head Studs are available in both Aluminium and Stainless Steel, and are ideal for applications that demand one side to be smooth and the head concealed.

TR Press Release

TR Fastenings Introduce a New Range of Low Displacement Head Studs

2011

TR introduces yet another new product range to its Self Clinch fasteners.

Since May 2011 TR Fastenings has stocked a range of Stainless Steel Low Displacement Head Studs.

This product is ideal for applications that require the stud to be close to the edge of an application, between 25% - 50% closer than standard Flush Head Studs.

The Low Displacement Head Studs will now be available in Stainless Steel or Plated Steel and in a variety of sizes.

2011

The TR Fastenings family has just got considerably bigger!

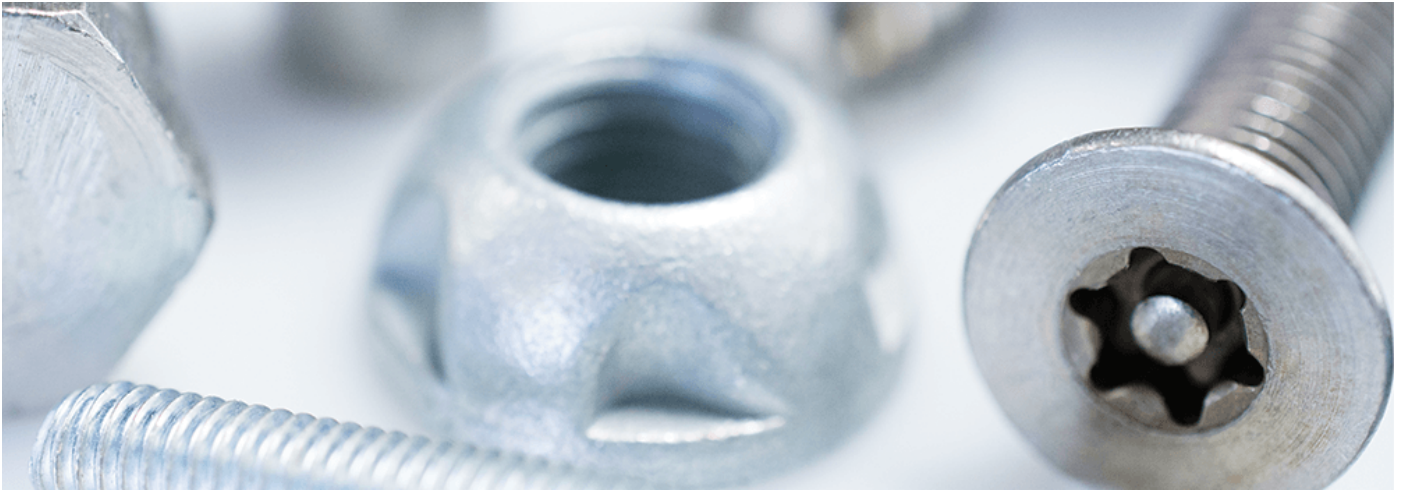

With a global manufacturing and distribution network, TR Fastenings already has an extensive stock of Hank Self Clinch products. However this range is set to increase by an incredible 20% over the coming months.

The Self Clinch range includes:

- Studs
- Nuts
- Standoffs
- Panel Fasteners
- Flush Head Pins
- Terminal Pins
- Cable Tie Mounts

With a product portfolio of nearly 1000 different parts, TR Fastenings is confident that they have the sheet metal fastening to suit your application needs.

2011

TR Fastenings specialise in a range of security products, including screws, nuts and installation tooling. These items are ideal for protecting valuable equipment or ensuring products are tamper-proof.

The Pin Hex Head Security Screw (Monodrive 7) is a popular type as it remains one of the most difficult screws to remove without the matching tooling.

2011

TR Fastenings manufactures the genuine Hank Rivet Bush from its purpose built factory here in the United Kingdom.

Sizes range from M2 up to M12, suitable for sheet thickness from 0.6mm up to 6.0mm. Additionally the genuine Hank Rivet Bush can be manufactured in a number of different materials including aluminium, brass, steel and stainless steels and a variety of finishes are also available.

The Hank Rivet Bush is available as a round serrated face, round serrated spigot, hexagon, blind, mini or as a standoff.

Despite Far East competition, this product remains very competitive and customers are reassured by the quality and engineering expertise offered by TR Fastenings.

TR Quality accreditations: ISO 9001:2008 & ISO/TS 16949

TR Press Release

Europe's Premier Range of Sheet Metal Fasteners

2011

The TR Fastenings Sheet Metal range is used in a large number of different industry sectors including Automotive, Electronic and White Goods, Telecommunications, Sheet Metal Subcontractors, Marine, Aerospace and Defence and many more.

- Quality accreditations: ISO 9001:2008 & ISO/TS 16949
- Design & engineering support
- Massive stock range available off the shelf
- European warehousing
- Industry standard interchangeability
- Extensive network of distributors & stockists Worldwide
- Performance data and installation guides readily available
- Professional and knowledgeable customer service
- Competitive pricing with reliable delivery throughout Europe

2011

TR Fastenings has developed one of the largest ranges of inserts and screws for plastics.

Our range of brass inserts is comprehensive with nine different designs to suit all types of applications in thermoplastics and thermosetting plastics.

Our range of screws for plastics has nine variants of head and drive types. The 30 degree thread angle enables superior screw performance with low drive torque whilst increasing pull out strengths in thermoplastics.
