

# Supplying the Medical industry with fasteners & components for over 25 years

## Support

**We're here to support you and can act swiftly** - Working with many of the industry leading healthcare OEM's and their subcontractors, TR provides a wide variety of fasteners and components for medical applications. Our knowledge of this sector allows us to support the specific needs of the industry, ranging from standard items to low volume bespoke parts.

Our aim is to work with designers, production and purchasing staff to deliver the most cost effective fastener solutions on both a local and global level.

## Applications

The components supplied by TR are used for the manufacture and assembly of a wide range of medical equipment applications. TR also has customers involved with products to support patient mobility and prosthetic limbs.

**Ventilators | medical beds & furniture | ultrasound machines | medical imaging equipment | defibrillators | incubators | medical computer stands | volumetric pumps & infusion devices | vacuum extractors | many other vital pieces of medical equipment**

## Products

TR supplies components to over 5000 companies globally across a wide range of industries. Every industry has specific needs in both product and quality requirements which we can meet through the extent of our portfolio and scope of our quality certifications. In addition to TR's extensive range of standard and branded fasteners, a large part of what we supply are to customer drawings, special parts and Cat C components.

**Steel & stainless steel products | plastic hardware | sheet metal fasteners | fasteners for plastic | hinges, gaskets & seals | castors & threaded tube inserts | locks & handles**
