## New Range Introduction: O-Rings and Bonded Seals enhance existing product offering

## O-Rings & Bonded Seals

**TR Fastenings has a comprehensive product range, now including an extensive selection of O-Rings and Bonded Seals, echoing their commitment to the ongoing investment in components that their customers need.**

The self-centralising Bonded Seals, manufactured from a combination of zinc-plated mild steel for the washer and nitrile for the seal, are available in a wide range of both metric and British Standard Pipe (BSP) sizes. They can be used in high pressure systems to provide leakproof seals for a variety of substances, including air, water and oil.

Similarly, TR's O-Rings are available in various specifications and can be ordered in specific sizes or in multi-size kits. Manufactured from either nitrile or fluorocarbon elastomer (FKM), they are available in more than 5,000 options, including all the major size requirements in BS, Metric, Imperial, and American Imperial. Relevant approval-related grades, such as WRAS, FDA and DVGW are also available.

O-Rings from TR can also be purchased in multi-size kits, which are ideal for engineers who need a supply for fast and effective repairs and replacements. O-Ring cord is available for repairs to non-standard applications as well as for making gaskets.

TR Fastenings design, manufacture and distribute industrial and Cat C components to more than 5,000 companies around the world, operating in business sectors including light vehicle, heavy vehicle, health & home, energy, tech & infrastructure and general industrial. The company, which has 34 locations including 7 high volume manufacturing sites and 3 Technical and

Innovation Centres, maintains a strong presence in the UK, Europe, the USA and Asia. We are continually listening to our customers' requirements which enable us to offer an increasingly extensive and diverse product range.
