

part of the Trifast plc Group

Compression Limiters

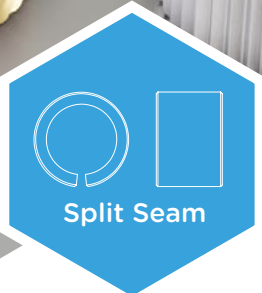

These products made to customer drawing are used extensively in plastic mouldings as through-holes, reducing the stress generated by threaded fasteners

Flanged

Oval

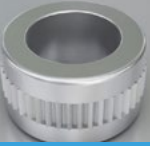

Split Seam

Symmetrical

They play an increasingly important role in automotive applications including electric vehicle (EV), electric vehicle battery (EVB) and in other industries.

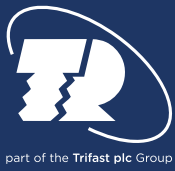

Product range	
	
Symmetrical	Flanged
	
Split seam	Oval

Available materials	
	
Steel	Stainless Steel
	
Brass	Aluminium
