

5-Lobe Pin

5-Lobe Pin

The 5-Lobe Pin security drive offers an improved tamper resistant drive (rated level 2 for security) compared to the more commonly available 6-Lobe Pin drive (rated level 1); as the tooling is more specialised and as a result harder for members of the general public to get hold of.

A4-70 Stainless Steel

A4-70 Stainless Steel is a high tensile strength stainless steel with excellent corrosion resistance, making it perfect for both internal, external applications and especially marine environments, food industry and medical equipment. Whilst this higher-grade steel is generally more expensive than A2 Stainless Steel fasteners, it can be more cost-effective over a longer period of time, due to its corrosion resistance and durability, which leads to reduced maintenance costs, fewer replacement parts and less down time due to equipment breakdown.

A favourite for high torque applications

- Stocked in A4-70 Stainless Steel Available to order in A2 Stainless Steel (MOQ's apply)
- Stocked in Countersunk and Button Head. Self Tapping and Machine Screws.
- Made to measure specials available to order (subject to MOQ's)

5-Lobe Pin for higher security

The rarer geometry of the 5-Lobe Pin drive means supply of tooling is controlled and therefore harder to obtain, enhancing the security of 5-Lobe Pin products.
