Table A. Pay and bonus (Female compared to Male):

The table shows that based on a median average, our female employees are paid 5.0% more than our male employees. The

	Median	Mean
Hourly Pay	+5.0%	-1.0%
Bonus Pay	0.0%	+0.0%

mean average displays our male employees as being 1.0% higher paid than our female employees. This result represents a change in the mean average from 3.0% in FY21 and the median average is now +5.0% compared to +7.0% in favour of female employees from FY21.

These results compare very favourably when compared with the national average of male employees being paid 8.3% more than female employees. Note that interpreting average earnings data is still slightly impacted by COVID-19, but this is now levelling off. Among full-time employees the gender pay gap in April 2022 was 8.3%; this was 7.7% in April 2021 and 9.0% in April 2019 (pre-coronavirus).

The bonus difference mean figure in Table A, shows equal data for mean bonus payments.

■ Received a bonus
■ Did not receive a bonus

These charts illustrate that the numbers of men and women paid a bonus are primarily inline. As a Company we continue to reward all our employees where applicable. The only reason the statistics do not show 100% is due to eligibility criteria based on start and finish dates of employees.
